

# PAF Add-In Products – Comparison

One of the great things about PAF 5 is that several commercial companies have created add-on products to supplement it. You can use different add-on products as needed to provide you with various additional features, so there's no reason not to use them all if desired.

This chart will help you understand better the two FamilySearch certified PAF add-

in products, Ancestral Quest (AQ) and FamilyInsight (FI). (Note that Ancestral Quest can also be used by itself as a replacement for PAF – in which case there are hundreds of additional features you can use in AQ. This chart focuses only on those features which are not also found in PAF itself, and does not include more advanced features that are only available if you no longer use the PAF database.)

Feature	AQ	FI
<b>PAF Add-In</b>
